📁 Project

Advanced IDPS Suite 🐍 | Python / C# / CSS / Tor / ML | [demo](#) 🔗 (Oct 2024 – Apr 2025)

Designed and implemented an Intrusion Detection and Prevention System (IDPS) using Python and netcap for real-time network monitoring. Integrated dark web scraping for threat intelligence, enhancing proactive security measures.

DoS Attack Detector 🐍 | Python | [demo](#) 🔗 (Jan 2024 – Mar 2024)

Developed a Python-based network traffic analysis tool to detect and mitigate DoS attacks in real-time. Implemented packet inspection techniques to identify malicious traffic patterns and prevent potential disruptions. Integrated network traffic logging for forensic analysis and threat intelligence.

Keylogger 🐍 | Python | [demo](#) 🔗 (Feb 2024 – Apr 2023)

Developed a security auditing tool capable of capturing keyboard securely transmitting the data via email. Designed for ethical security testing and vulnerability assessment to evaluate information system resilience against potential threats.
